Supporting Premier Reseller JTSI, Inc.**

**VANCOUVER, WA – January 28, 2009** - [CRU-DataPort](#) announces [JTSI, Inc.](#) as Hawaii's authorized CRU solution provider. CRU-DataPort, a leading supplier of rugged removable and portable hard drive technology, partners with JTSI to provide data storage, data security and data mobility solutions to JTSI customers globally. For decades, Federal agencies around the world have relied on CRU-DataPort products for data security, data backup and data mobility needs. Virtually all Department of Defense agencies have standardized on CRU-DataPort products.

“CRU-DataPort and JTSI are a good fit”, says Dan Bovee, Vice President of Sales for CRU-DataPort. “JTSI is the preeminent solution provider in Hawaii supporting Federal, state and local government as well as commercial IT users.” CRU-DataPort partners with top tier solution providers with demonstrated expertise in data storage and extensive experience in supporting the public and commercial IT sector. CRU-DataPort products are available to Federal customers for a variety of Government wide acquisition contracts and blanket purchase agreements.

CRU-DataPort products meet a variety of data management needs. Disk-based-backup is a faster and more affordable way to protect digital assets, while advanced encryption ensures sensitive data is secure. WiebeTech, a brand of CRU-DataPort, offers portable RAID products and data forensics tools used by law enforcement worldwide.

CRU-DataPort and JTSI will be meeting in Hawaii with Government, education and corporate customers February 2-6, 2009. CRU-DataPort executives will be on-site demonstrating the latest technologies for data backup, data forensics, data encryption and data security solutions. (See schedule)

For more information about CRU-DataPort products or to schedule a meeting with company executives while CRU is in Honolulu, please contact Erik Lowe at JTSI at erik@jtsii.net or (808) 457-3065.

**About CRU-DataPort**

*Founded in 1986, CRU-DataPort is a pioneer in data security and data mobility devices. The company's flagship DataPort®, along with Data Express® and RhinoJR® (formerly manufactured by StorCase), and WiebeTech product brands of removable and external hard drive enclosures are the de facto standard for physical data security and safe data transporting in government, education and business markets. CRU-DataPort products are also widely used in media rich data environments including audio/video production, digital cinema, video security capture, and disk-2-disk backup and archiving applications. Backed by the industry's leading warranties and connector ratings, CRU-DataPort products are available through major distributors, PC manufacturers, specialty system builders and resellers throughout the world.*
